

Year 4 Maths

| Counting           |  |
|--------------------|--|
| Objectives         | count backwards through zero to include negative numbers   |
|                    | count in multiples of 6, 7, 9, 25 and 1000   |
|                    | find 1000 more or less than a given number   |
| Reasoning          | <b>Spot the mistake:</b><br>950, 975, 1000, 1250<br>What is wrong with this sequence of numbers?   |
|                    | <b>True or False?</b><br>324 is a multiple of 9?   |
|                    | <b>What comes next?</b><br>6706 + 1000 = 7706<br>7706 + 1000 = 8706<br>8706 + 1000 = 9706<br>.....   |
| Vocabulary         | ten thousand<br>hundred thousand<br>million<br>sixes<br>sevens<br>nines<br>twenty-fives<br>next<br>consecutive<br>integer<br>positive<br>negative<br>above/below zero<br>minus<br>negative numbers |
| Resources / models | Number line<br>Colour in number squares greater than 100   |

| Comparing numbers |  |
|-------------------|--|
| Objectives        | order and compare numbers beyond 1000  |
|                   | <i>compare numbers with the same number of decimal places up to two decimal places (copied from Fractions)</i> |

|           |   |
|-----------|---|
| Reasoning | <p><b>Do, then explain</b><br/>                     5035 5053 5350 5530 5503<br/>                     If you wrote these numbers in order starting with the largest, which number would be third?<br/>                     Explain how you ordered the numbers.</p> |
|-----------|---|

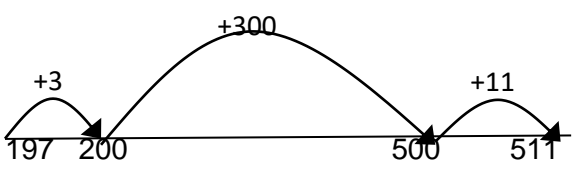

| IDENTIFYING, REPRESENTING AND ESTIMATING NUMBERS |  |
|--|--|
| Objectives                                       | identify, represent and estimate numbers using different representations |
| Resources / models                               | Dienes, numicon, number lines, counters, part part whole model           |

| READING AND WRITING NUMBERS<br>(including Roman Numerals) |   |
|---|---|
| Objectives  | read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value. |
| Vocabulary  | Roman numeral, digit, zero, place value   |
| Resources / models  | Clock face with Roman Numerals  |

| UNDERSTANDING PLACE VALUE |   |
|---------------------------|---|
| Objectives                | <p>recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones)</p> <p><i>find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as units, tenths and hundredths</i><br/>                     (copied from Fractions)</p>  |
| Reasoning                 | <p><b>Do, then explain</b><br/>                     Show the value of the digit 4 in these numbers?<br/>                     3041 4321 5497<br/>                     Explain how you know.</p> <p><b>Make up an example</b> Create four digit numbers where the digit sum is four and the tens digit is one.<br/>                     Eg 1210, 2110, 3010<br/>                     What is the largest/smallest number?</p> |
| Vocabulary                | Place value,<br>Digit<br>Numeral<br>figures   |
| Resources / models        | Place value cards / counters<br>Dienes<br>Place value grids / counters  |

|                             |  |
|-----------------------------|--|
|                             | Digit cards<br>Place value slider  |
| Objectives                  | round any number to the nearest 10, 100 or 1 000   |
|                             | <i>round decimals with one decimal place to the nearest whole number</i><br>(copied from Fractions)  |
| Reasoning                   | <b>Possible answers</b><br>A number rounded to the nearest ten is 540. What is the smallest possible number it could be?                             |
|                             | <b>What do you notice?</b><br>Round 296 to the nearest 10. Round it to the nearest 100. What do you notice? Can you suggest other numbers like this? |
| Resources / Models          | Number lines<br>Empty number lines   |
| Objective - Problem Solving | solve number and practical problems that involve all of the above and with increasingly large positive numbers                                       |

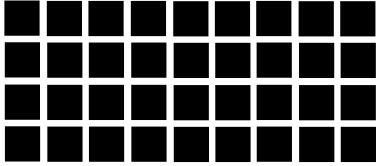

| Addition and Subtraction        |   |
|---------------------------------|---|
| Objectives - Mental Calculation | <b>True or false?</b><br>Are these number sentences true or false?<br>$6.7 + 0.4 = 6.11$<br>$8.1 - 0.9 = 7.2$<br>Give your reasons.   |
|                                 | <b>Hard and easy questions</b><br>Which questions are easy / hard?<br>$13323 - 70 =$<br>$12893 + 300 =$<br>$19354 - 500 =$<br>$19954 + 100 =$<br>Explain why you think the hard questions are hard?   |
| Objectives - WRITTEN METHODS    | add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate  |
| Reasoning                       | <b>Convince me</b><br> - 666 = 8  5<br><br>What is the largest possible number that will go in the rectangular box?<br>What is the smallest?<br>Convince me |
| Vocabulary - addition           | add, more, plus, and, make, altogether, total, equal to,, equals, double, most, count on, number line, sum, tens, ones, partition, addition, column ,tens boundary, hundreds boundary, increase, vertical, 'carry', expanded, compact<br><br>thousands, hundreds, digits, inverse   |

|                                 |   |  |
|---------------------------------|---|--|
| <p>Resources / models</p>       | <p>Manipulatives used to model and check work - Dienes, place value cards / counters</p>  |  |
|                                 | <p><math>346 + 238 = 584</math></p> <p><math>300 + 40 + 6</math><br/> <math>200 + 30 + 8</math><br/> <u><math>500 + 70 + 14 = 584</math></u></p>  | <p>Children will move onto the expanded columnar addition method. They will initially be supported in this by using practical equipment.</p>   |
|                                 | <p><math display="block">\begin{array}{r} 267 \\ + 324 \\ \hline 11 \quad (7+4) \\ 80 \quad (60+20) \\ + 500 \quad (200+300) \\ \hline 591 \end{array}</math></p>   | <p>The children will quickly move on to adding the least significant digit first. As children begin to understand the value of number they will move on from the expanded method.</p>  |
|                                 | <p><math display="block">\begin{array}{r} 367 \\ + \quad 85 \\ \hline 452 \\ \hline 11 \end{array}</math></p>   | <p>When the children show a good understanding of number they will move on to the compact column method with carrying. The carried over number is written below the line. Also they can add a different number of digits together.</p>                                     |
| <p>Vocabulary - Subtraction</p> | <p>equal to, take, take away, less, minus, subtract, leaves, distance between, how many more, how many fewer / less than, most, least, count back, how many left, how much less is __?, difference, count on, strategy, partition, tens, units, exchange, decrease, hundreds, value, digit, inverse</p> |  |
|                                 | <p><math>511 - 197 = 314</math></p>    | <p><b>Counting on.</b> If the numbers in a calculation are close together or near to a multiple of 10, 100 etc. children can use the counting on method. Starting from the smallest number and counting up to the largest number. Finding out how many are in between.</p> |

|                             |  |  |   |   |   |              |              |   |   |              |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |  |  |   |   |   |   |   |              |              |   |   |              |   |   |   |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |
|-----------------------------|--|--|---|---|---|--------------|--------------|---|---|--------------|---|---|---|---|---|---|--|--|--|--|--|--|--|--|--|--|--|--|--|--|--|--|--|--|--|--|--|---|---|---|---|---|---|--|--|--|--|---|---|---|---|---|--------------|--------------|---|---|--------------|---|---|---|--|--|---|---|---|---|---|---|---|---|---|---|---|---|---|---|--|---|---|---|---|---|---|---|---|---|---|---|---|---|--|--|
|                             | <table border="1"> <tr><td></td><td>2</td><td>7</td><td>5</td><td>4</td><td>-</td><td>1</td><td>5</td><td>6</td><td>2</td><td>=</td><td>1</td><td>1</td><td>9</td><td>2</td></tr> <tr><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td></tr> <tr><td></td><td></td><td></td><td></td><td></td><td></td><td>6</td><td>0</td><td>0</td><td>1</td><td>5</td><td>0</td><td></td><td></td><td></td></tr> <tr><td></td><td>2</td><td>0</td><td>0</td><td>0</td><td>+</td><td><del>7</del></td><td><del>0</del></td><td>0</td><td>+</td><td><del>5</del></td><td>0</td><td>+</td><td>4</td><td></td></tr> <tr><td></td><td>-</td><td>1</td><td>0</td><td>0</td><td>0</td><td>+</td><td>5</td><td>0</td><td>0</td><td>+</td><td>6</td><td>0</td><td>+</td><td>2</td></tr> <tr><td></td><td>1</td><td>0</td><td>0</td><td>0</td><td>+</td><td>1</td><td>0</td><td>0</td><td>+</td><td>9</td><td>0</td><td>+</td><td>2</td><td></td></tr> </table> |  | 2 | 7 | 5 | 4            | -            | 1 | 5 | 6            | 2 | = | 1 | 1 | 9 | 2 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  | 6 | 0 | 0 | 1 | 5 | 0 |  |  |  |  | 2 | 0 | 0 | 0 | + | <del>7</del> | <del>0</del> | 0 | + | <del>5</del> | 0 | + | 4 |  |  | - | 1 | 0 | 0 | 0 | + | 5 | 0 | 0 | + | 6 | 0 | + | 2 |  | 1 | 0 | 0 | 0 | + | 1 | 0 | 0 | + | 9 | 0 | + | 2 |  | <p>Children will use <b>partitioning</b>. They will use place value cards and Thousands, Hundreds, tens and units practical apparatus to help them see the numbers. Children will not exchange at first.</p> |
|                             | 2  | 7  | 5 | 4 | - | 1            | 5            | 6 | 2 | =            | 1 | 1 | 9 | 2 |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |  |  |   |   |   |   |   |              |              |   |   |              |   |   |   |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |
|                             |  |  |   |   |   |              |              |   |   |              |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |  |  |   |   |   |   |   |              |              |   |   |              |   |   |   |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |
|                             |  |  |   |   |   | 6            | 0            | 0 | 1 | 5            | 0 |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |  |  |   |   |   |   |   |              |              |   |   |              |   |   |   |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |
|                             | 2  | 0  | 0 | 0 | + | <del>7</del> | <del>0</del> | 0 | + | <del>5</del> | 0 | + | 4 |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |  |  |   |   |   |   |   |              |              |   |   |              |   |   |   |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |
|                             | -  | 1  | 0 | 0 | 0 | +            | 5            | 0 | 0 | +            | 6 | 0 | + | 2 |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |  |  |   |   |   |   |   |              |              |   |   |              |   |   |   |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |
|                             | 1  | 0  | 0 | 0 | + | 1            | 0            | 0 | + | 9            | 0 | + | 2 |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |  |  |   |   |   |   |   |              |              |   |   |              |   |   |   |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |
|                             | $  \begin{array}{r}  615 \\  2754 \\  - 1562 \\  \hline  1192  \end{array}  $  | <p>This leads to <b>decomposition</b>.</p> |   |   |   |              |              |   |   |              |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |  |  |   |   |   |   |   |              |              |   |   |              |   |   |   |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |
| Objective                   | estimate and use inverse operations to check answers to a calculation  |  |   |   |   |              |              |   |   |              |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |  |  |   |   |   |   |   |              |              |   |   |              |   |   |   |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |
| Reasoning                   | <p><b>Making an estimate</b><br/>           Which of these number sentences have the answer that is between 550 and 600<br/>           1174 - 611<br/>           3330 - 2779<br/>           9326 - 8777</p> <p><b>Always, sometimes, never</b><br/>           Is it always sometimes or never true that the difference between two odd numbers is odd.</p>   |  |   |   |   |              |              |   |   |              |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |  |  |   |   |   |   |   |              |              |   |   |              |   |   |   |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |
| Objective - Problem Solving | solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why   |  |   |   |   |              |              |   |   |              |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |  |  |   |   |   |   |   |              |              |   |   |              |   |   |   |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |

| MULTIPLICATION & DIVISION FACTS               |  |
|---|--|
| Objectives - facts                            | count in multiples of 6, 7, 9, 25 and 1 000<br>(copied from Number and Place Value)  |
|   | recall multiplication and division facts for multiplication tables up to 12 × 12   |
| Reasoning                                     | <p><b>Missing numbers</b><br/>           72 = <span style="background-color: #d9e1f2; border: 1px solid black; display: inline-block; width: 15px; height: 15px;"></span> × <span style="background-color: #d9e1f2; border: 1px solid black; display: inline-block; width: 15px; height: 15px;"></span><br/>           Which pairs of numbers could be written in the boxes?</p> |
|   | <p><b>Making links</b> Eggs are bought in boxes of 12. I need 140 eggs; how many boxes will I need to buy?</p>   |
| MULTIPLICATION & DIVISION Mental calculations |  |

|            |  |
|------------|--|
| Objectives | use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers   |
|            | recognise and use factor pairs and commutativity in mental calculations (appears also in Properties of Numbers)  |
| Reasoning  | <p><b>Use a fact</b></p> <p><math>63 \div 9 = 7</math><br/>Use this fact to work out<br/><math>126 \div 9 =</math><br/><math>252 \div 7 =</math></p>   |
|            | <p><b>Making links</b></p> <p>How can you use factor pairs to solve this calculation?<br/><math>13 \times 12</math><br/>(<math>13 \times 3 \times 4</math>, <math>13 \times 3 \times 2 \times 2</math>, <math>13 \times 2 \times 6</math>)</p> |

| MULTIPLICATION & DIVISION Written Calculations |   |
|--|---|
| Objectives                                     | multiply two-digit and three-digit numbers by a one-digit number using formal written layout  |
| Reasoning                                      | <p><b>Prove It</b></p> <p>What goes in the missing box?<br/><math>6 \square \times 4 = 512</math><br/>Prove it.</p>   |
|  | <p><b>How close can you get?</b></p> <p><math>\square \square \square \times 7</math></p> <p>Using the digits 3, 4 and 6 in the calculation above how close can you get to 4500? What is the largest product? What is the smallest product?</p>   |
| Vocabulary                                     | groups of, lots of, times, array, altogether, multiply, total, count up in, multiplied by, column, row, repeated addition, commutative, sets of, equal groups, _ times as big as, once, twice, three times etc.<br>partition, grid method, multiple, product, tens, units, value<br><i>square, factor, integer, decimal, short / long multiplication, 'carry'</i> |
| Resources / Models                             | <div style="display: flex; align-items: center;">  <div style="margin-left: 10px;"> <p><math>4 \times 9 = 36</math></p> <p><math>9 \times 4 = 36</math></p> </div> </div> <p>Arrays are still useful.</p>  |

|                              |  |   |
|------------------------------|--|---|
|                              | $38 \times 5 = (30 \times 5) + (8 \times 5)$ $= 150 + 40$ $= 190$<br>$\begin{array}{r} x \quad 300 \quad 40 \quad 6 \\ 9 \quad \boxed{2700} \quad \boxed{360} \quad \boxed{54} \\ \hline = 3114 \end{array}$   | <p>Children will multiply larger numbers using their times tables knowledge and <b>partitioning</b> the numbers.</p> <p>This will lead onto the children using the <b>grid method</b> for multiplication.</p> |
| <p>Vocabulary - Division</p> | <p>share, share equally, one each, two each..., group, groups of, lots of, array, divide, divided by, divided into, division, grouping, number line, left, left over, inverse, short division, 'carry', remainder, multiple</p> <p><b>divisible by, factor</b></p> |   |
| <p>Models / resources</p>    |  |   |
|                              | $\begin{array}{r} 218 \\ 4 \overline{) 872} \\ \underline{- 800} \quad (200 \times 4) \\ 070 \\ \underline{- 40} \quad (10 \times 4) \\ 32 \\ \underline{- 32} \quad (8 \times 4) \\ 0 \end{array}$  | <p>This leads to a vertical recording of chunking.</p> <p><b>Top tip:</b> Children to subtract chunks they are most comfortable with</p> <p>Work out 2x<br/>5x<br/>10x</p>                                    |
|                              | $218 \div 4$<br>$218$  | <p>This will lead to short division but only when the children have a good</p>  |

|   |   |   |
|---|---|---|
|   | $\begin{array}{r} 4 \overline{) 8732} \\ \underline{4} \phantom{00} \\ 47 \phantom{0} \\ \underline{40} \phantom{0} \\ 73 \phantom{0} \\ \underline{68} \phantom{0} \\ 50 \phantom{0} \\ \underline{48} \phantom{0} \\ 20 \phantom{0} \\ \underline{20} \\ 0 \end{array}$   | understanding of the numbers. E.g. how many 3's are in 70. A link to multiplication would be beneficial here. |
| <b>PROPERTIES OF NUMBERS: MULTIPLES, FACTORS, PRIMES, SQUARE AND CUBE NUMBERS</b> |   |   |
| Reasoning   | <p><b>Always, sometimes, never?</b></p> <p>Is it always, sometimes or never true that an even number that is divisible by 3 is also divisible by 6.</p> <p>Is it always, sometimes or never true that the sum of four even numbers is divisible by 4.</p>   |   |
| <b>INVERSE OPERATIONS, ESTIMATING AND CHECKING ANSWERS</b>                        |   |   |
| Objective   | <i>estimate and use inverse operations to check answers to a calculation</i><br>(copied from Addition and Subtraction)  |   |
| Reasoning   | <p><b>Use the inverse</b><br/>Use the inverse to check if the following calculations are correct:<br/> <math>23 \times 4 = 92</math><br/> <math>117 \div 9 = 14</math></p> <p><b>Size of an answer</b><br/>Will the answer to the following calculations be greater or less than 300<br/> <math>152 \times 2 =</math><br/> <math>78 \times 3 =</math><br/> <math>87 \times 3 =</math><br/> <math>4 \times 74 =</math></p> |   |
| <b>PROBLEM SOLVING</b>  |   |   |
| Objective   | solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects  |   |

|                                     |  |
|-------------------------------------|--|
| <b>COUNTING IN FRACTIONAL STEPS</b> |  |
| Objectives                          | count up and down in hundredths  |
| Reasoning                           | <p><b>Spot the mistake</b><br/>sixty tenths, seventy tenths, eighty tenths, ninety tenths, twenty tenths ... and correct it.</p> <p><b>What comes next?</b><br/> <math>83/100, 82/100, 81/100, \dots, \dots, \dots</math><br/> <math>31/100, 41/100, 51/100, \dots, \dots</math></p> |
| Vocabulary                          | <p>Hundredths</p> <p>Decimal</p> <p>Decimal fraction</p> <p>Decimal point</p> <p>Decimal place</p> <p>Decimal equivalent</p>   |

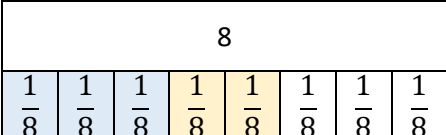

|  |            |
|--|------------|
|  | Proportion |
|--|------------|

| RECOGNISING FRACTIONS           |  |
|---------------------------------|--|
| Objectives                      | recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten  |
| Reasoning                       | <b>What do you notice?</b><br>$1/10$ of 100 = 10<br>$1/100$ of 100 = 1<br>$2/10$ of 100 = 20<br>$2/100$ of 100 = 2<br>How can you use this to work out $6/10$ of 200?<br>$6/100$ of 200? |
|                                 | <b>True or false?</b><br>$1/20$ of a metre = 20cm<br>$4/100$ of 2 metres = 40cm  |
| Reasoning - comparing fractions | Give an example of a fraction that is more than a half but less than a whole. Now another example that no one else will think of.  |
|                                 | Explain how you know the fraction is more than a half but less than a whole. (draw an image)   |

| Comparing DECIMALS |  |
|--------------------|--|
| Objectives         | compare numbers with the same number of decimal places up to two decimal places  |
| Reasoning          | <b>Missing symbol</b><br>Put the correct symbol < or > in each box<br>$3.03$ <input type="checkbox"/> $3.33$<br>$0.37$ <input type="checkbox"/> $0.32$ |
|                    | What needs to be added to 3.23 to give 3.53?   |
|                    | What needs to be added to 3.16 to give 3.2?  |

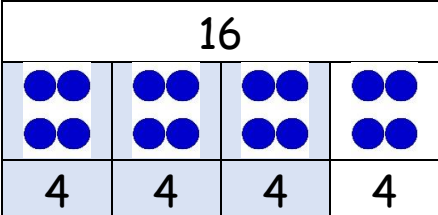

| Rounding including DECIMALS |  |
|-----------------------------|--|
| Objectives                  | round decimals with one decimal place to the nearest whole number  |
| Reasoning                   | <b>Do, then explain</b><br>Circle each decimal which when rounded to the nearest whole number is 5.<br>$5.3$ $5.7$ $5.2$ $5.8$<br>Explain your reasoning |
|                             | <b>Top tips</b><br>Explain how to round numbers to one decimal place?<br><i>Also see rounding in place value</i>   |

| EQUIVALENCE (INCLUDING FRACTIONS, DECIMALS AND PERCENTAGES)  |  |                  |                |                  |               |                  |                  |               |                  |               |  |     |  |               |  |  |  |               |               |  |               |  |               |  |               |  |               |               |               |  |               |               |               |  |               |               |               |               |               |               |               |               |               |               |               |
|--|--|------------------|----------------|------------------|---------------|------------------|------------------|---------------|------------------|---------------|--|-----|--|---------------|--|--|--|---------------|---------------|--|---------------|--|---------------|--|---------------|--|---------------|---------------|---------------|--|---------------|---------------|---------------|--|---------------|---------------|---------------|---------------|---------------|---------------|---------------|---------------|---------------|---------------|---------------|
| Objectives   | recognise and show, using diagrams, families of common equivalent fractions  |                  |                |                  |               |                  |                  |               |                  |               |  |     |  |               |  |  |  |               |               |  |               |  |               |  |               |  |               |               |               |  |               |               |               |  |               |               |               |               |               |               |               |               |               |               |               |
|  | recognise and write decimal equivalents of any number of tenths or hundredths  |                  |                |                  |               |                  |                  |               |                  |               |  |     |  |               |  |  |  |               |               |  |               |  |               |  |               |  |               |               |               |  |               |               |               |  |               |               |               |               |               |               |               |               |               |               |               |
|  | recognise and write decimal equivalents to $\frac{1}{4}$ ; $\frac{1}{2}$ ; $\frac{3}{4}$   |                  |                |                  |               |                  |                  |               |                  |               |  |     |  |               |  |  |  |               |               |  |               |  |               |  |               |  |               |               |               |  |               |               |               |  |               |               |               |               |               |               |               |               |               |               |               |
| Reasoning  | <p><b>Odd one out.</b><br/>Which is the odd one out in each of these trio<br/> <math>\frac{3}{4}</math>    <math>\frac{9}{12}</math>    <math>\frac{4}{6}</math><br/> <math>\frac{9}{12}</math>    <math>\frac{10}{15}</math>    <math>\frac{2}{3}</math><br/>                     Why?</p>  |                  |                |                  |               |                  |                  |               |                  |               |  |     |  |               |  |  |  |               |               |  |               |  |               |  |               |  |               |               |               |  |               |               |               |  |               |               |               |               |               |               |               |               |               |               |               |
|  | <p><b>What do you notice?</b><br/>Find <math>\frac{4}{6}</math> of 24<br/>Find <math>\frac{2}{3}</math> of 24<br/>What do you notice?<br/>Can you write any other similar statements?</p>  |                  |                |                  |               |                  |                  |               |                  |               |  |     |  |               |  |  |  |               |               |  |               |  |               |  |               |  |               |               |               |  |               |               |               |  |               |               |               |               |               |               |               |               |               |               |               |
|  | <p><b>Complete the pattern by filling in the blank cells in this table:</b></p> <table border="1" style="margin-left: 20px;"> <tr> <td style="text-align: center;"><math>\frac{1}{10}</math></td> <td style="text-align: center;"><math>\frac{2}{10}</math></td> <td style="text-align: center;"><math>\frac{3}{10}</math></td> <td style="width: 20px;"></td> </tr> <tr> <td style="text-align: center;"><math>\frac{10}{100}</math></td> <td style="text-align: center;"><math>\frac{20}{100}</math></td> <td></td> <td style="text-align: center;"><math>\frac{40}{100}</math></td> </tr> <tr> <td style="text-align: center;">0.1</td> <td></td> <td style="text-align: center;">0.3</td> <td></td> </tr> </table> | $\frac{1}{10}$   | $\frac{2}{10}$ | $\frac{3}{10}$   |               | $\frac{10}{100}$ | $\frac{20}{100}$ |               | $\frac{40}{100}$ | 0.1           |  | 0.3 |  |               |  |  |  |               |               |  |               |  |               |  |               |  |               |               |               |  |               |               |               |  |               |               |               |               |               |               |               |               |               |               |               |

| ADDITION AND SUBTRACTION OF FRACTIONS |  |
|---------------------------------------|--|
| Objectives                            | add and subtract fractions with the same denominator   |
| Reasoning                             | <p><b>What do you notice?</b><br/> <math>5/5 - 1/5 = 4/5</math><br/> <math>4/5 - 1/5 = 3/5</math><br/> <b>Continue the pattern</b></p> <p>Can you make up a similar pattern for addition?<br/>                     The answer is <math>3/5</math>, what is the question?</p> |
|                                       | <p>What do you notice?<br/> <math>11/100 + 89/100 = 1</math><br/> <math>12/100 + 88/100 = 1</math><br/> <math>13/100 + 87/100 = 1</math><br/>                     Continue the pattern for the next five number sentences</p>  |
| Resources / Models                    | <p><b>Add and subtract fractions with a common denominator</b></p> <div style="text-align: right; margin-right: 100px;"> <math>\frac{3}{8} + \frac{2}{8} = \frac{5}{8}</math> </div>       |

| MULTIPLICATION AND DIVISION OF DECIMALS |   |
|---|---|
| Objectives                              | find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths  |
| Reasoning                               | <p><b>Undoing</b></p> <p>I divide a number by 100 and the answer is 0.3. What number did I start with?</p>  |
|   | <p><b>Another and another</b></p> <p>Write down a number with one decimal place which when multiplied by 10 gives an answer between 120 and 130.</p> <p>... and another, ... and another, ...</p> |
| Resources / Models                      |   |

**Problem Solving – Fractions, decimals, percentages**

|                    |   |
|--------------------|---|
| Objectives         | solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number |
| Reasoning          | solve simple measure and money problems involving fractions and decimals to two decimal places.   |
| Resources / Models | <p><b>Calculate quantities</b></p> <p><math>\frac{3}{4}</math> of 16 = 12</p>                      |

| EQUATIONS |   |
|-----------|---|
| Reasoning | <p><b>Connected Calculations</b><br/>Put the numbers 7.2, 8, 0.9 in the boxes to make the number sentences correct.</p> <p> <math>\square = \square \times \square</math><br/> <math>\square = \square \div \square</math> </p> |
| FORMULAE  |   |
|           | <p><i>Perimeter can be expressed algebraically as <math>2(a + b)</math> where <math>a</math> and <math>b</math> are the dimensions in the same unit.</i><br/>(Copied from NSG measurement)</p>                                  |
| Reasoning | <p><b>Undoing</b><br/>If the longer length of a rectangle is 13cm and the perimeter is 36cm, what is the length of the shorter side?<br/>Explain how you got your answer.</p>   |

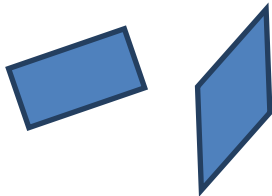

| COMPARING AND ESTIMATING |  |
|--------------------------|--|
| Objective                | estimate, compare and calculate different measures, including money in pounds and pence (also included in Measuring) |
| Reasoning                | <p><b>Top Tips</b><br/>Put these amounts in order starting with the largest.<br/>Half of three litres</p>            |

|  |   |
|--|---|
|  | <p>Quarter of two litres<br/>300 ml<br/>Explain your thinking</p> <p><b>Position the symbols</b><br/>Place the correct symbols between the measurements &gt; or &lt;<br/>£23.61 2326p 2623p<br/>Explain your thinking.</p>  |
|  | <p><b>Undoing</b><br/>Imran's swimming lesson lasts 50 mins and it takes 15 mins to change and get ready for the lesson. What time does Imran need to arrive if his lesson finishes at 6.15pm?</p> <p><b>Explain thinking</b><br/>The time is 10:35 am.<br/>Jack says that the time is closer to 11:00am than to 10:00am.<br/>Is Jack right? Explain why.</p> |

| MEASURING and CALCULATING |   |
|---------------------------|---|
| Objective                 | estimate, compare and calculate <b>different measures</b> , including <b>money in pounds and pence</b><br>(appears also in Comparing)   |
|                           | measure and calculate the <b>perimeter</b> of a rectilinear figure (including squares) in centimetres and metres  |
| Reasoning                 | <p><b>Write more statements</b><br/>One battery weighs the same as 60 paperclips;<br/>One pencil sharpener weighs the same as 20 paperclips.<br/>Write down some more things you know.<br/>How many pencil sharpeners weigh the same as a battery?</p> <p><b>Testing conditions</b><br/>If the width of a rectangle is 3 metres less than the length and the perimeter is between 20 and 30 metres, what could the dimensions of the rectangle be?<br/>Convince me.</p> <p><b>Possibilities</b><br/>Adult tickets cost £8 and Children's tickets cost £4. How many adult and children's tickets could I buy for £100 exactly?<br/>Can you find more than one way of doing this?</p> |
|                           | Objective<br>find the area of rectilinear shapes by counting squares  |
|                           | Reasoning<br><b>Always, sometimes, never</b><br>If you double the area of a rectangle, you double the perimeter.<br><i>See also Geometry Properties of Shape</i>  |

| TELLING THE TIME |   |
|------------------|---|
| Objectives       | read, write and convert time between analogue and digital 12 and 24-hour clocks<br>(appears also in <i>Converting</i> )   |
|                  | solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days<br>(appears also in <i>Converting</i> )   |
| Reasoning        | <b>Working backwards</b><br>Put these times of the day in order, starting with the earliest time.<br>A: Quarter to four in the afternoon<br>B: 07:56<br>C: six minutes to nine in the evening<br>D: 14:36 |
| Vocabulary       | Leap year<br>Millennium<br>Noon<br>Date of birth<br>Timetable, arrive, depart   |

| CONVERTING |   |
|------------|---|
| Objectives | convert between different units of measure (e.g. kilometre to metre; hour to minute)  |
|            | read, write and convert time between analogue and digital 12 and 24-hour clocks<br>(appears also in <i>Converting</i> )   |
|            | solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days<br>(appears also in <i>Telling the Time</i> )                                   |
| Reasoning  | <b>The answer is ....</b><br>225 metres<br>What is the question?<br><br><b>What do you notice?</b><br><br>What do you notice?<br>1:00pm = 13:00<br>2:00pm = 14:00<br><br>Continue the pattern |

| IDENTIFYING SHAPES AND THIER PROPERTIES |  |
|---|--|
| Objective                               | identify lines of symmetry in 2-D shapes presented in different orientations   |
| Reasoning                               | <p><b>What's the same, what's different?</b><br/>                     What is the same and what is different about the <u>diagonals</u> of these 2-D shapes?</p>    |
|   | <p><b>Visualising</b><br/>                     Imagine a square cut along the diagonal to make two triangles. Describe the triangles.<br/>                     Join the triangles on different sides to make new shapes. Describe them.<br/>                     (you could sketch them)<br/>                     Are any of the shapes symmetrical? Convince me.</p>                          |
| Vocabulary                              | Line<br>Construct<br>Sketch<br>Centre<br>Angle, right-angled<br>Base, square-based<br>Reflect, reflection<br>Regular, irregular<br><br>2-D, two-dimensional<br>Oblong<br>Equilateral triangle<br>Isosceles triangle<br>Scalene triangle<br>Heptagon<br>Parallelogram<br>Rhombus<br>Trapezium<br>Polygon<br><br>3-D, three-dimensional<br>Spherical<br>Cylindrical<br>Tetrahedron<br>Polyhedron |

| DRAWING AND CONSTRUCTING |  |
|--------------------------|--|
| Objective                | complete a simple symmetric figure with respect to a specific line of symmetry   |
| Reasoning                | <b>Other possibilities</b> Can you draw a non-right angled triangle with a line of symmetry?<br>Are there other possibilities. |

| COMPARING AND CLASSIFYING |  |
|---------------------------|--|
| Objectives                | compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes   |
| Reasoning                 | <b>Always, sometimes, never</b><br>Is it always, sometimes or never true that the two diagonals of a rectangle meet at right angles.   |
|                           | <b>Other possibilities</b><br>Can you show or draw a polygon that fits both of these criteria?<br>What do you look for?<br>"Has exactly two equal sides."<br>"Has exactly two parallel sides." |

| Angles     |   |
|------------|---|
| Objectives | identify acute and obtuse angles and compare and order angles up to two right angles by size  |
| Reasoning  | <b>Convince me</b><br>Ayub says that he can draw a right angled triangle which has another angle which is obtuse.<br>Is he right?<br>Explain why. |
| Vocabulary | acute, obtuse, right angle, estimate, order   |

| POSITION, DIRECTION AND MOVEMENT |   |
|----------------------------------|---|
| Objectives                       | describe positions on a 2-D grid as coordinates in the first quadrant   |
|                                  | describe movements between positions as translations of a given unit to the left/right and up/down  |
|                                  | plot specified points and draw sides to complete a given polygon  |
| Reasoning                        | <p><b>Working backwards</b><br/>                     Here are the co-ordinates of the corners of a rectangle, which has a width of 5.<br/>                     (7, 3) and (27, 3)<br/>                     What are the other two co-ordinates?</p> |
| Vocabulary                       | North-east, north-west<br>South-east, south-west<br>NE, NW, SE, SW<br>Translate, translation<br>Rotate, rotation<br>Degree<br>Reflection<br>Ruler, set square<br>Angle measurer<br>Compass  |

| INTERPRETING, CONSTRUCTING AND PRESENTING DATA |   |
|--|---|
| Objectives                                     | interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs  |
|  | solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.   |
| Reasoning                                      | <p><b>True or false?</b> (Looking at a graph showing how the class sunflower is growing over time) "Our sunflower grew the fastest in July".</p>  |
|  | <p><b>Is this true or false?</b><br/> <b>Convince me.</b><br/>                     Make up your own 'true/false' statement about the graph.</p>   |
|  | <p><b>What's the same, what's different?</b><br/>                     Pupils identify similarities and differences between different representations and explain them to each other</p> |
|  | <p><b>Create a questions</b> Pupils ask (and answer) questions about different statistical representations using key vocabulary relevant to the objectives. (see above)</p>             |
| Vocabulary                                     | survey, questionnaire, data   |
