

Zero Hunger

Broxfield Farm

We learned about sustainability and the benefits of locally sourced food. We went to Broxfield Farm and learned about how meat is sourced locally. We got to make organic wheat out of seeds and we saw how cows fed their babies milk.

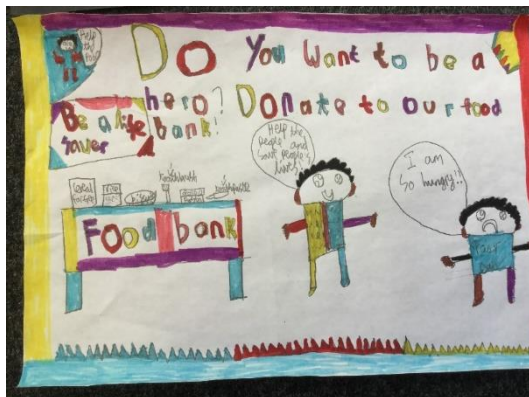

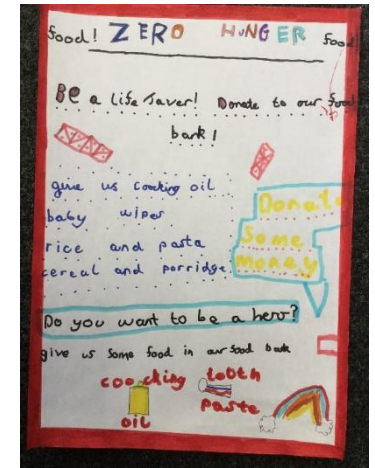

Growing Vegetables

We planted tomatoes, peppers, courgettes, beans and strawberries. We weeded the flour beds and moved the plants outside when they were big enough.

The Food Bank

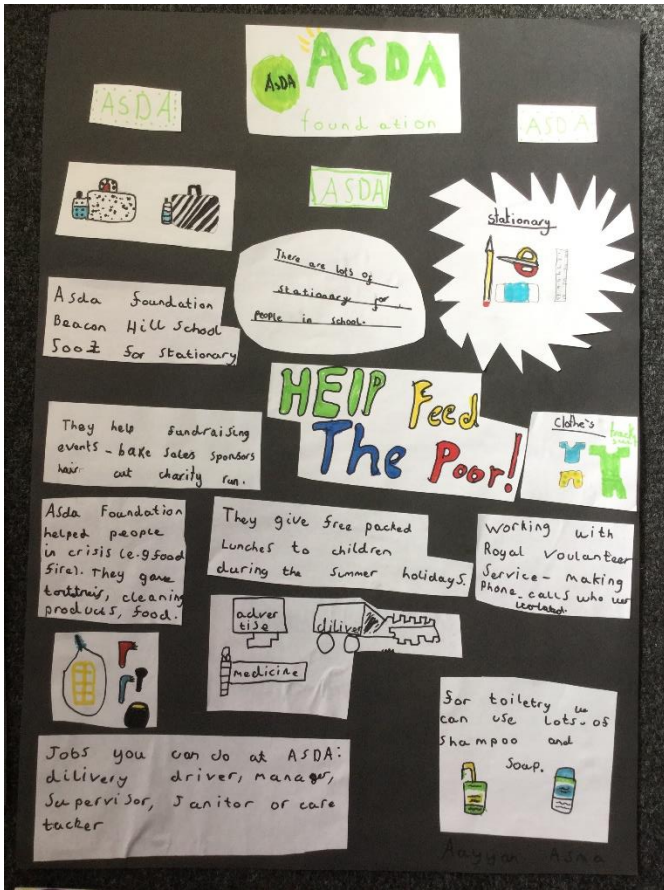

We learned about the local food bank and what they do to help our local community. We put collection boxes for the food bank in school and created posters and videos to encourage people to donate. Some of us walked to the food bank to deliver the food and to donate the lettuce we had grown.

Please watch our video...

ASDA Foundation

We carried out online research about the Asda Foundation and found out what they have done to support charities and community projects. We also looked at some of the jobs that people do at Asda. We created posters to show what we found out.
