

Nursery - Hedgehog Class

Are we all the same?

We began our enquiry based learning by introducing the vocabulary 'same' and 'different'. It was important that the children had a solid understanding before we started our enquiry.

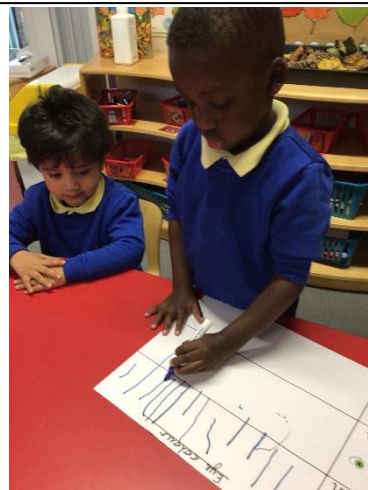

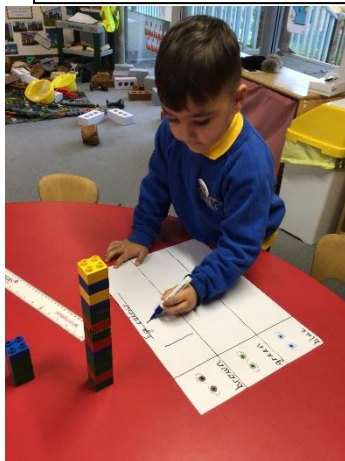

We also set up a wall in class ready to display all of our amazing work!

We started by looking at gender. We learned that we are not the same because some of us are boys and some of us are girls. We then began by looking at our eye colour.

We produced a pictogram and tally chart to collect the data. We now know that we don't all have the same

We then went a step further and looked at appearance. We talked about hair colour/style, eye colour, skin colour, clothes etc.

We used a mirror to create self-portraits, we then used these self-portraits and created our own face on a paper plate.

After learning that we are all different with our appearances we decided to talk about and learn some likes and dislikes. We shared one thing we like and dislike with our friends and created a visual so that you can see we are not all the same.

We brought in a photograph from home which included our families. We shared our photographs with our friends by getting up and talking about them. This was great for our confidence.

We also talked about the jobs our parents do and looked at a range of different jobs. We all came up with what we would like to be when we were older. We had some fantastic ambitions including a teacher, a bin man, a spaceman and a hairdresser!

We looked at some jobs that help us and learned that we don't all have the same job either!

We created family pictures and portraits

We got creative and designed a house. In the house we placed our photograph. These would later become our calendars for 2022!

We are now learning that we are not all the same and that actually we are all different and unique. But it's great to be different because regardless everybody is AMAZING!!

We went on to learn about where our families come from. We know that we live in the United Kingdom but we have friends and family that come from all over the world.

Our end product
