

Physical Education Curriculum Intent

We strive to give children high quality PE by working alongside external coaching staff to upskill teachers in this area. We want to teach children skills that will have a lifelong impact on their future and that all children have the right to participate no matter what their ability. We believe that PE can positively affect attitude and behaviour by teaching respect, honesty and tolerance in our lessons and we want to give children opportunities that inspire them to participate and succeed in physical activity. We want to teach children how to work individually, collaborate with others as part of a team, in school lessons and sporting events and understand fairness and equality.
