

EBL Story How has the use of the River Tyne changed over time?

The children produced a free verse poem within small groups (3/4) based around the changes of use with the River Tyne.

We have focused on our local area looking at History and Geography of the area. For our EBL this was history based looking at the people how industries have changed and how this has affected the use of the river and surrounding areas.

The children have undertaken of independent research. They have looked at shipbuilding, the coal industry, population and the bridges over the river and how these changed to fit the purpose of the time.
