Scotland, England,  
Northern Ireland, Wales

United Kingdom of  
Great Britain and  
Northern Ireland

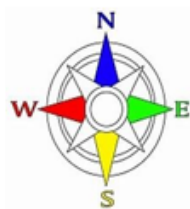

#### Weather types

Sun, Rain, Wind, Cloud

#### Compass Points

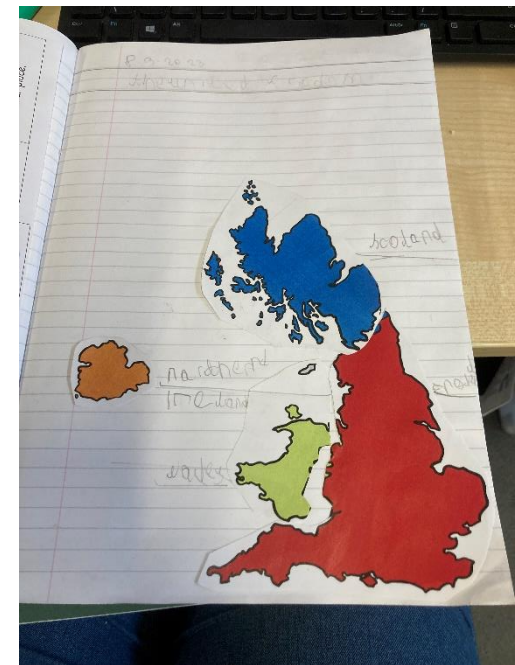

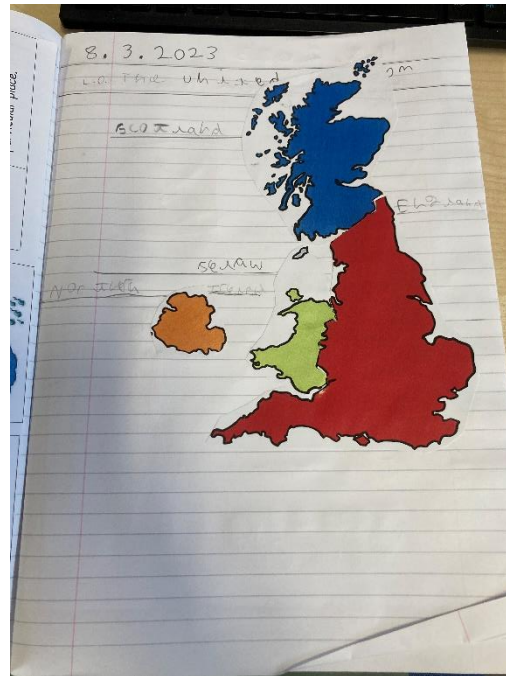

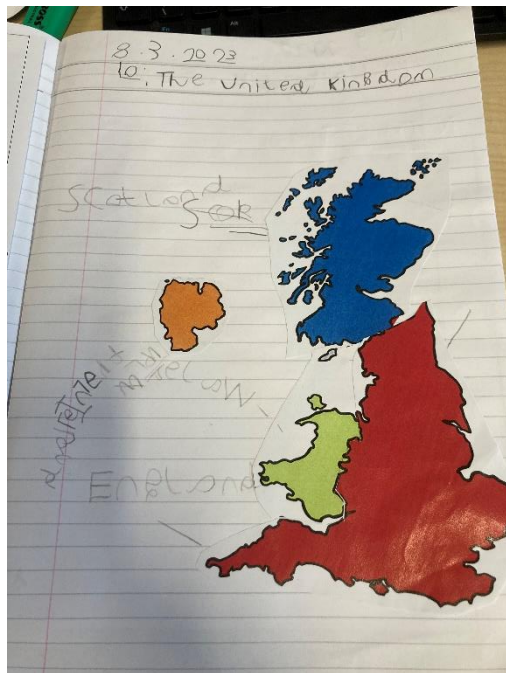

North  
East  
South  
West

#### Key Vocabulary

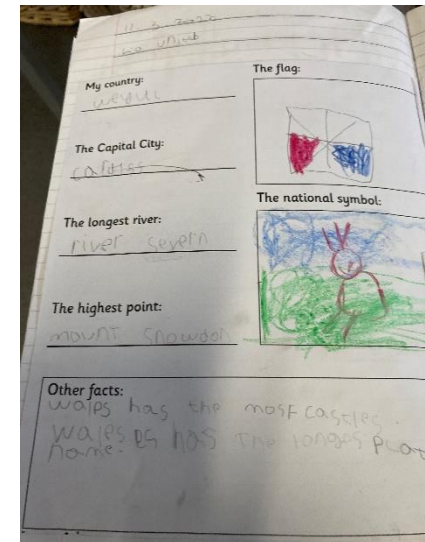

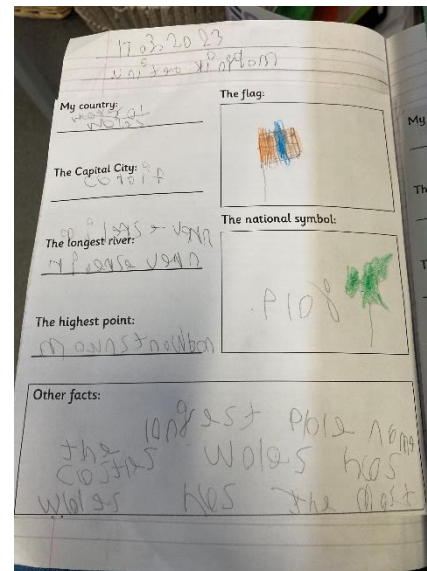

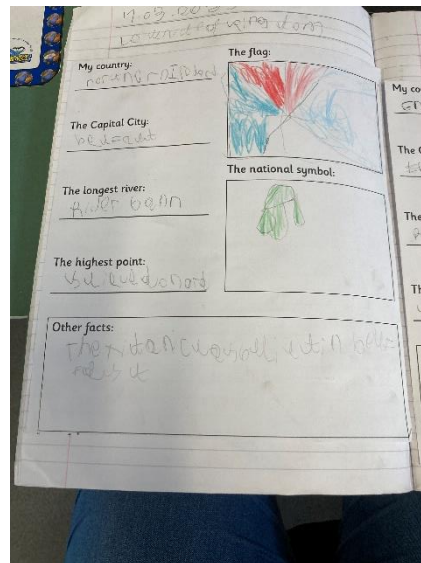

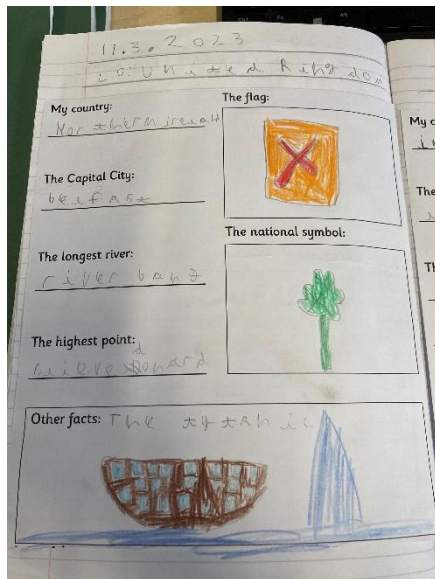

<b>Map</b>	A map is an image of an area, usually of the Earth or part of the Earth.
<b>Globe</b>	Spherical model of earth
<b>Atlas</b>	A book of maps or charts
<b>United Kingdom</b>	group of islands off the northwest coast of Europe. Made up mainly of: England, Northern Ireland, Scotland, Wales
<b>Compass</b>	A tool used to find direction
<b>Aerial photo</b>	A photo taken from air/space
<b>Spring</b>	Season from March-May
<b>Weather</b>	Daily state of the atmosphere - sun, rain, wind, cloud
<b>Weather patterns</b>	Over time - day/week in a particular place.

We looked at a map of the world to see if we could find the United Kingdom. It was hard to find. We then found a map of the UK and talked about what we could see. We found lots of Islands and a lot of water surrounding our country.

We then had the 4 countries cut up and we had to put it back together and label it.

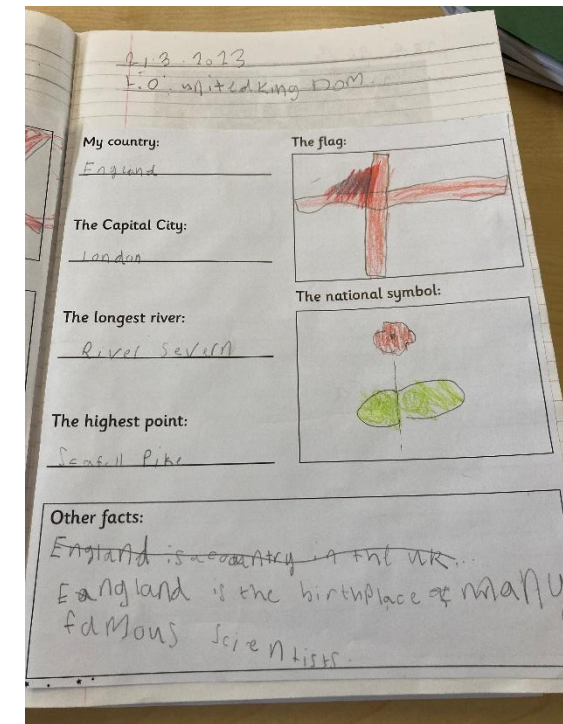

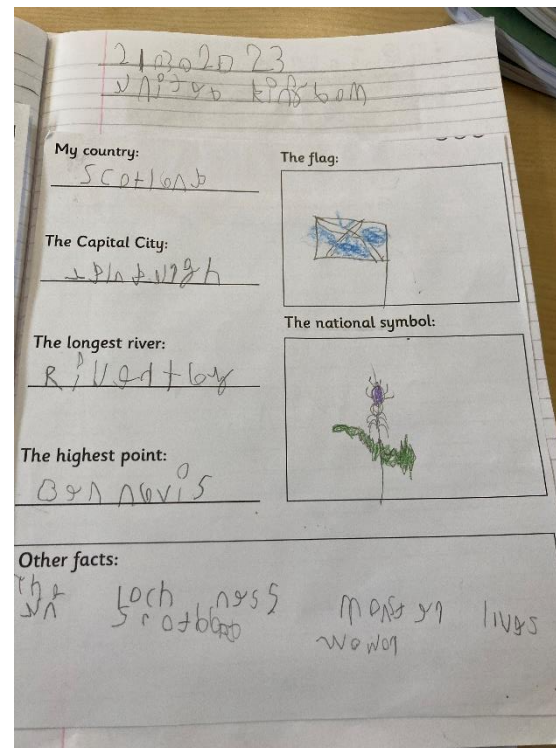

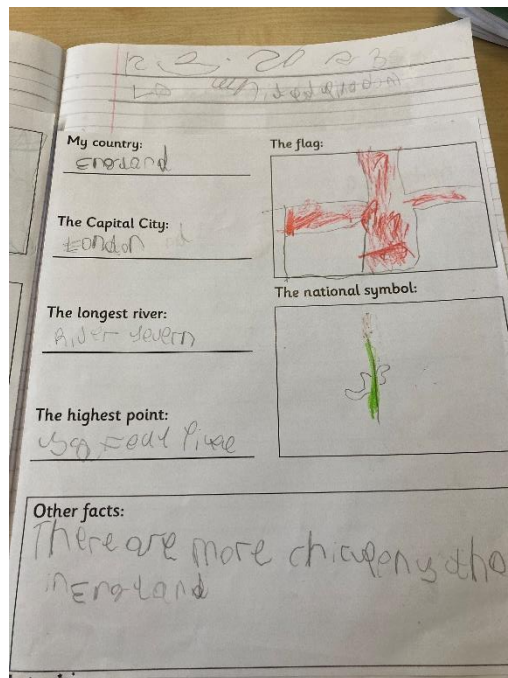

We then worked in 2 teams, one team used Ipads to research Wales and the other to research Northern Ireland. We found some interesting facts and then shared the facts with the other team.

We then worked in 2 teams, one team used Ipads to research Scotland and the other to research England. We found some interesting facts and then shared the facts with the other team.

We discussed with our friends what we had found the most interesting about the country we had researched. Everyone has to take turns and listen to what everyone was saying.

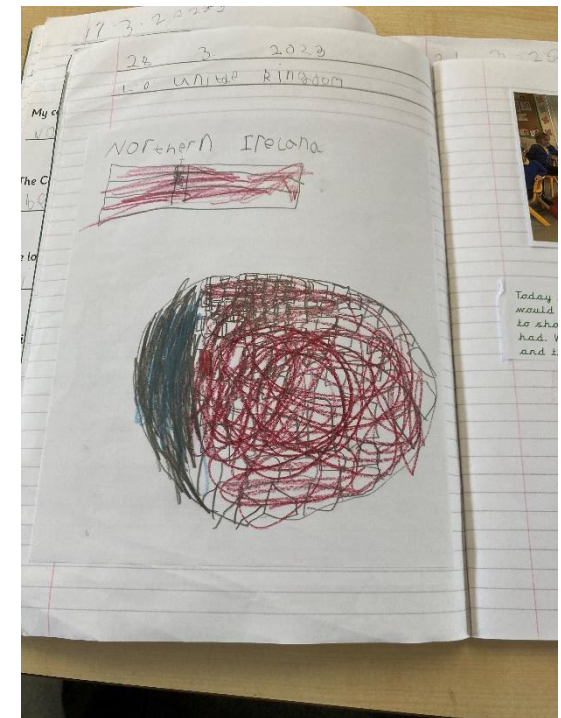

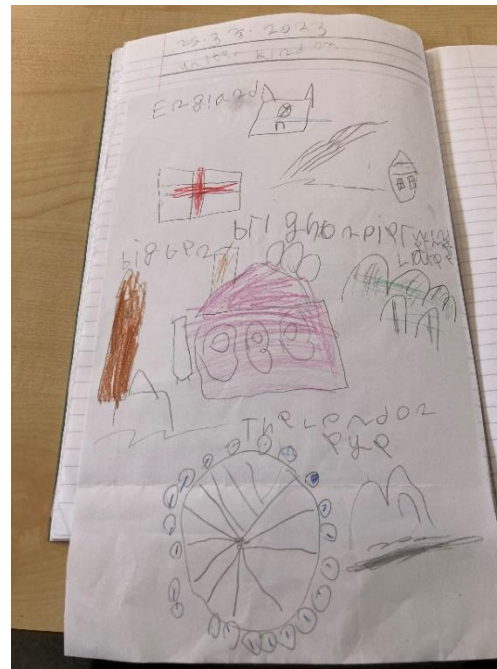

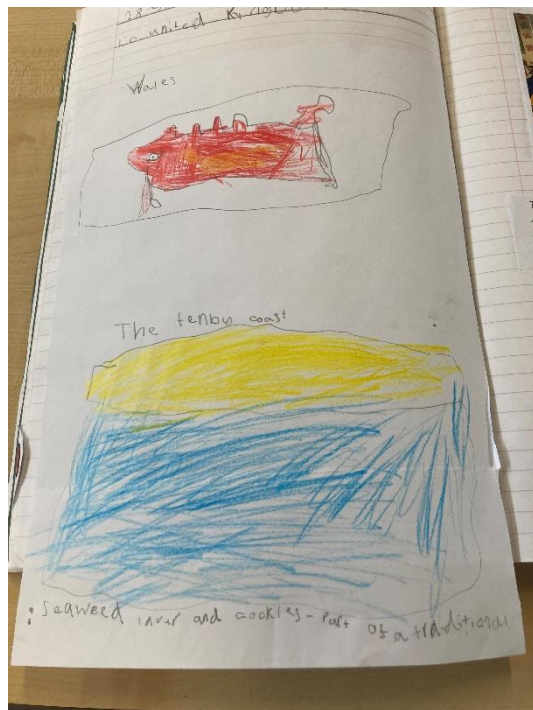

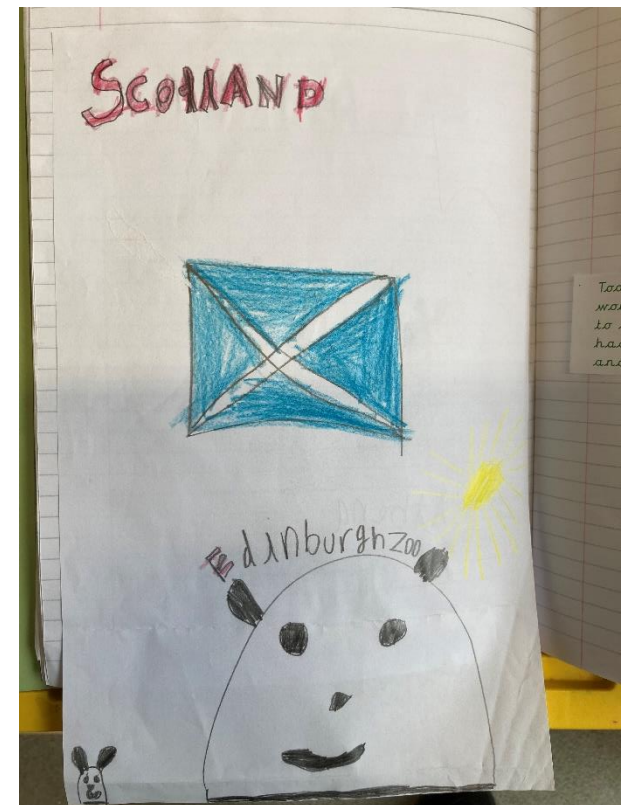

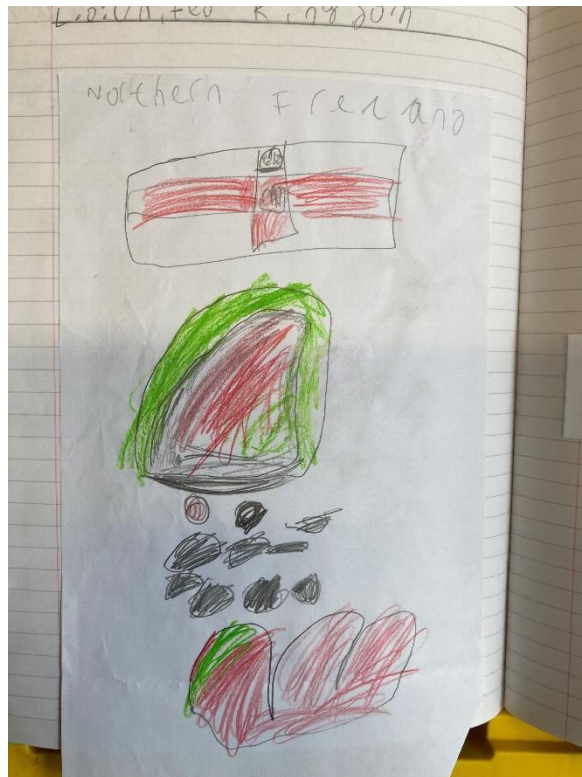

We designed a poster of our favourite country in the United Kingdom to show everyone what made it special and why we wanted to move there.

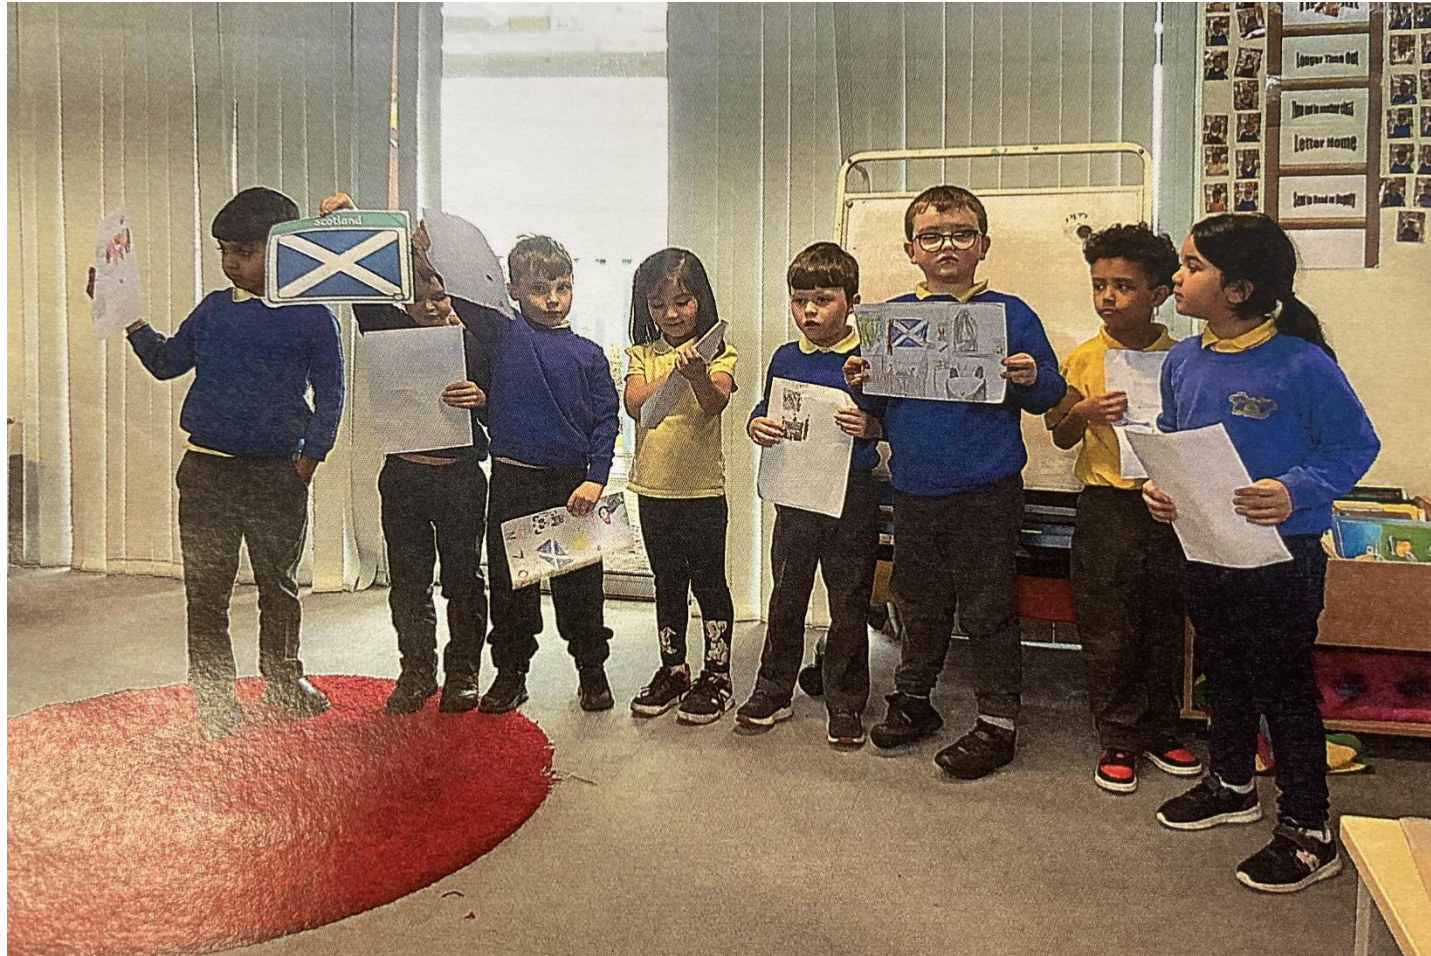

We found others who liked the same country and as a group we presented our posters and finding to the rest of the class and told them why we wanted to live there.

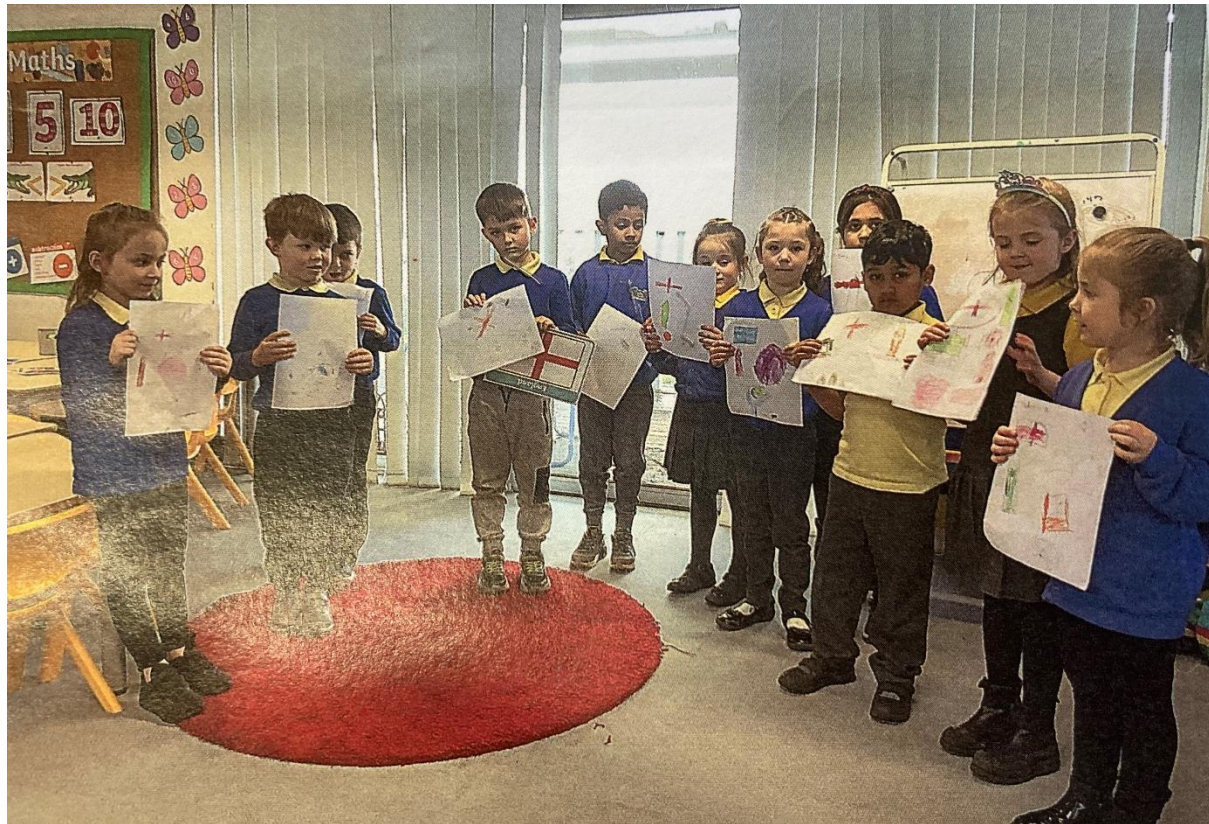

# Scotland

# England

# Wales
