

# Would you rather live in the Stone Age, Bronze Age or the Iron Age?

How do we know about the past?  
Archaeologists!

How did shelter/houses change from the Stone Age to the Iron Age?

	Stone Age				
	Palaolithic	Mesolithic	Neolithic	Bronze Age	Iron Age
Pictures:					
What were the walls made of?	made out of rocks	Wooden posts with animal skin mud and leaves to cover them.	Wattle woven twigs and daub. Stone and mud small stones.	Stone wall.	Wattle Wattle and daub.
What was the roof made of?	made out of rock	Wooden posts with animal skin mud and leaves to cover them.	Woven animal skin or twigs laid over driftwood.	Thick or animal skin thrown over a wooden cone of beams, woven twigs and animal poop.	thatched straw and twigs, woven twigs and animal poop.
What was the door made of?	they didn't have a door	they didn't have a door.	Animal skin.	Wattle and daub or a stone wall. Wattle and daub. Animal skin.	The door was made out of wood.
Other facts:	The earliest human shelter were natural caves and natural rock shelters.	people started to make more permanent settlements.	Inside the houses, evidence suggests they had bed frames and shelves made from wood or stone.	Farming became important during Bronze Age. People no longer used one building for everything they had a main house for living in and a separate one for cooking and other jobs.	Settlements of streets of houses have been discovered.

Tools and Weapons from prehistory

	Stone Age	Bronze Age	Iron Age
Tools			
Weapons			
What tools and weapons did they have?	Spears, Stone axes and Hammerstones, Bones and bone needles, Bow and arrows, Antlers.	Daggers, spears and shields, Bow and arrows, Also axes, axe head, they also used blades, Arrow heads and ploughs, Also sickles.	Daggers, Swords, spears and Hammers, Axe, long, chisels and plough.
What were the tools and weapons made from?	Strong Stone and some shaping flint, some rock as well, Wood and elastic material.	Copper and tin, Leather, animal skin and wood, Bronze, stone, clay pots, Stone wheels and wood, wooden wheels.	Making metal, Hammered into shape, Wood and stone. Also smelting.
Order them from easiest to hardest to make.	Stone age	Bronze age	Iron age
Which would you prefer?	Stone age because	the stone is the easiest to	make so you can hunt.

In groups we researched what they wore.

How clothing changed over time.

Foods that have been around since the Stone Age

# Make your choice and persuade people... which was the best time period?

## STONE AGE

Shelters

I would pick stone age because they had a great shelter which they used heavily for food instead of how they used animal skin & such as in the palaeolithic and Mesolithic but in the Neolithic and the Bronze Age. In the Neolithic for the long they had skins or animal skins. In the palaeolithic people usually would stay in the same shelter because they needed to find other more food and sometimes they had to travel for a long and place from their home to other who needed to find more permanent settlements.

Tools and Weapons

In the stone age they created tools and weapons to survive and to hunt animals. They used hammers, stone axes, spears, flint, and bones and wood. So they had plenty of tools and weapons. They were usually made from stone, wood.

clothes

They wore simple clothes some were made from animal skins. They were made from animal skins. In the palaeolithic they wore clothes from animal skins and some were made from wool.

## Iron Age Bronze

Tools

All the tools were made of iron and bronze. They were made from iron and bronze. They were made from iron and bronze.

Houses

Bronze age houses were made of stone and wood. They were made of stone and wood. They were made of stone and wood.

Food

In the Bronze age they ate a lot of meat and bread. They ate a lot of meat and bread. They ate a lot of meat and bread.

Other reasons to be in the Bronze age

In the Bronze age they had a lot of tools and weapons. They had a lot of tools and weapons. They had a lot of tools and weapons.

## Amazing Bronze age

Tools

They made tools and weapons from iron and bronze. They made tools and weapons from iron and bronze. They made tools and weapons from iron and bronze.

Weapons

They made weapons from iron and bronze. They made weapons from iron and bronze. They made weapons from iron and bronze.

Shelters

They made shelters from stone and wood. They made shelters from stone and wood. They made shelters from stone and wood.

Food

They ate a lot of meat and bread. They ate a lot of meat and bread. They ate a lot of meat and bread.

## BRONZE AGE!!!!

Tools

They made tools and weapons from iron and bronze. They made tools and weapons from iron and bronze. They made tools and weapons from iron and bronze.

Weapons

They made weapons from iron and bronze. They made weapons from iron and bronze. They made weapons from iron and bronze.

Shelters

They made shelters from stone and wood. They made shelters from stone and wood. They made shelters from stone and wood.

Food

They ate a lot of meat and bread. They ate a lot of meat and bread. They ate a lot of meat and bread.

Other reasons to be in the Bronze age

In the Bronze age they had a lot of tools and weapons. They had a lot of tools and weapons. They had a lot of tools and weapons.
