

Year 6 Zebras – Spring Term

What Is Voltage and How Does It Affect the Brightness Of A Bulb?

After we were given our enquiry question, we were able to use our prior knowledge to explore electrical circuits and investigate what the affect is on a bulb if we add more components.

In ICT, we used the computers to research more about voltage and used the knowledge we have had learned in our science lessons about electricity to create a PowerPoint presentation. We were able to use the skills learned in ICT in autumn term to make our presentations engaging.

We then had the opportunity to present our presentations to Year 4 and Year 5 to practice our oracy skills and presentation skills.
